# K15

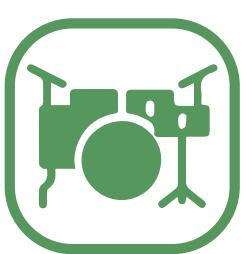

Built-in power supply

Lightweight portable

OTG live

Drum accompaniment

Bluetooth/APP control

Microphone echo reverberation

# K15

5 Color Options

K15 is a compact and portable smart multi-functional instrument loudspeaker, combining professional sound effects with a portable experience. Equipped with a large-capacity lithium battery, it boasts a battery life of over 2 hours. Crafted with a wooden cabinet and hand-wrapped leather, it offers a delicate tactile quality while being sturdy and durable. Equipped with a 4" full-range driver, it delivers an output power of 15W, a frequency response range of 20Hz~20kHz, and a signal-to-noise ratio of >71dB, ensuring clean and full sound quality. With a variety of interfaces, it supports multiple device access such as guitars and microphones, and enables live streaming while charging, ensuring no dropouts during performances. Equipped with built-in clear, overload, distortion, heavy metal, chorus, and flanger effects, it easily adapts to different playing styles. It supports independent volume adjustments for music and microphones, as well as echo and reverberation effects for microphones, enhancing the spatial sensation of vocals. It can be controlled via Bluetooth and an app, features a built-in handle design for lightweight portability, and offers five fashionable color options. This loudspeaker is ideal for playing and singing, providing a comprehensive solution for home entertainment, online streaming, travel, and more.

## Introduction to panel functions

- Preset Guitar Tones
- Auto Drum Machine
- Track Selection
- Play / Pause
- Guitar Volume
- Mic Volume / Reverb
- Master Volum

## Introduction to backplane interfaces

- 6.35mm Guitar Input
- 6.35mm Mic Input
- 3.5mm AUX Input
- Stereo Headphone Jack
- USB OTG Port
- Power Inpu

**Output Power** 15W

**Frequency Response** 20Hz~20kHz

**Signal-to-Noise Ratio** >71dB

**Battery Specification** 11.1V / 1200mAh lithium battery

**Battery Specification** 4" full-range loudspeaker

**Battery Life** >2 hours

**Product Dimension(LxHxW)** 234x156x146mm

# K65

5 Color Options

K65 is a compact and portable smart multi-functional instrument loudspeaker, boasting a small size and powerful sound quality, perfect for on-the-go use. Equipped with a large-capacity lithium battery, it boasts a battery life of over 4 hours, meeting the needs of long outdoor use. Crafted with a wooden cabinet and hand-wrapped leather, it offers a delicate tactile quality while being sturdy and durable. Equipped with a 4" chassis and two 1" tweeter, it delivers a frequency response range of 20Hz~20kHz, ensuring rich and powerful bass and clean and transparent treble. It supports Bluetooth and app connection and control, is compatible with multiple audio formats, and allows independent volume adjustments for music and microphones. Through OTG technology, it can directly connect to devices such as phones and computers for real-time transmission and recording of live audio. It supports dual-mode charging for on and off, features a built-in handle design for lightweight portability, and offers five fashionable color options. This loudspeaker is ideal for playing and singing, providing a comprehensive solution for home entertainment, online streaming, travel, and more.

# K100

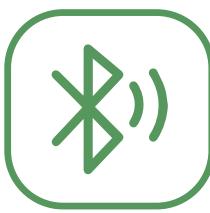

Built-in power supply

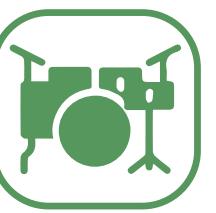

13 preset instrument modes

Drum machine A / B switch

Bluetooth / App control

Support automatic drum machine

OTG live

# K100

5 Color Options

K100 features dual 4" chassis and dual 1" tweeters, creating a wide and balanced stereo sound field effect, with a frequency response range of 45Hz~20kHz, rich and powerful bass, transparent and delicate treble, and a signal-to-noise ratio of >70dB, accurately reproducing every sound detail. Equipped with a large-capacity lithium battery, it boasts a battery life of over 2.5 hours, meeting the needs of short outdoor use. Supporting 13 preset instrument modes, multiple effect mode adjustments for instruments and microphones, automatic drum machine and AVB segment switching for drum machines, as well as Bluetooth & OTG live streaming connections for quick pairing and high-definition audio transmission. Equipped with an OLED display for real-time monitoring of device status and easy switching between performance styles. Rich interfaces allow for easy connection to various devices such as instruments and microphones. With a built-in handle design, two installation angles, and five fashionable color options. This loudspeaker is suitable for playing and singing simultaneously, providing a complete solution for home entertainment, online live streaming, travel, and more.

## Introduction to panel functions

- Bluetooth & OTG Live Streaming
- Multiple Effect Modes for Instruments & Microphone
- 13 Preset Instrument Modes
- Auto Drum Machine
- AVB Pattern Switching for Drum Machine
- OLED Display
- Track Selection
- Play / Pause

## Introduction to backplane interfaces

- 3.5mm Stereo Line Input Interface
- 3.5mm Headphone Output Interface
- 6.35mm Stereo Output Interface
- 6.35mm Instrument Input Interface
- Balanced Combination XLR Microphone Input

Output Power	100W
Frequency Response	45Hz~20kHz
Signal-to-Noise Ratio	>70dB
Display	OLED display screen
Speaker Driver	4" woofer x2 + 1" tweeter x2
Battery Specification	10.8V / 5100mAh lithium battery
Battery Life	> 2.5 hours
